

Integrated financial management software for the hospitality industry!

FAST FLEXIBLE FINANCIALS
developed by

TCS is a leading provider of highly flexible financial management software that will integrate with Phoenix Hospitality Software to provide a seamless solution for your business.

Benefits of Using ORCA

Flexibility

- Object-oriented technology facilitates quick and easy customisation of back-office reports, functions, screens, validation control, and business rules
- Platform choice (NT, Open VMS, Linux/Unix)
- Multi-language and currency capabilities
- Group and large organisations can upgrade to ORCA Financials for multiple property consolidation and reporting.
- In-built auditing and security with flexible profiles

Ease of Use

- Offers the familiarity of Excel for ad hoc reporting combined with the power of Crystal reports for standard reporting
- Use of ad hoc query tools enables users to manipulate and access data faster and more readily shortening response times to management queries
- Automated reporting enables users to dramatically reduce period end closing and reporting time

Low Cost of Ownership

- Runs faster on significantly smaller and cheaper platforms
- Simple to maintain, requiring less administration

Why use ORCA Hospitality?

- Back office accounting specifically designed for the hospitality industry
- Real time updates from Phoenix Hospitality software
- Integration with third party Point of Sale solutions
- Incorporating Trust Accounting designed exclusively for hospitality
- Integrated Payroll module
- Automated distribution of "commercial documents", i.e. purchase orders, payment advices, sales invoices, debtor statements, etc, to suppliers and customers by internet email.
- Browser or text based screens operating over LAN, WAN or Internet.
- Remote access via internet or dial-up connections
- Full procedure manual and on-screen help combined with our professional support facilities

TCS's flagship product, ORCA Hospitality, has been developed to work with the Phoenix range of products to provide a fully integrated financial management solution. Immediate access to your financial information allows you to make smarter business decisions while significantly increasing productivity.

Industry analysis has identified the need for tight integration between applications. This solution reduces duplicate data entry whilst improving accuracy and control of your business. ORCA Hospitality is the preferred back-office solution for Phoenix Hospitality software.

Financials and So Much More

The heart of the application is a fully transaction-based object design, which supports multi-currency, multi-user and fully integrated modular and functional workflow.

Application Integrity

- Full system audit trail for all financial updates.
- User definable audit profiles allow monitoring of Read/Write/Delete actions on all data.
- Security profiles allow for the creation and manipulation of user groups to control application access and permissions.
